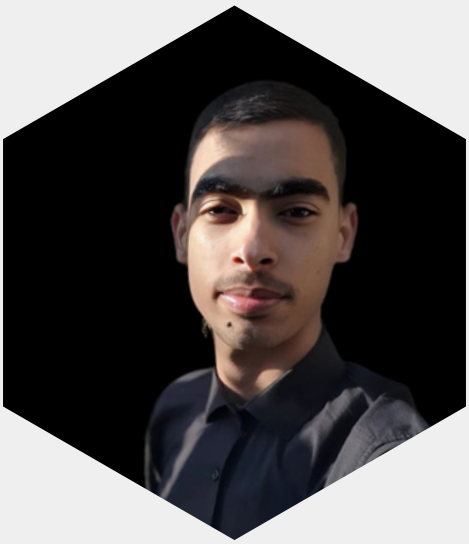
MOHAMMED **BASHIR**

DATA SCIENCE & AI



ABOUT ME

Passionate Data Engineer specializing in data warehousing, data integration, and analytics.
Skilled in database design, ETL development, and data visualization using Python, SQL,Power BI ,Airtable
Experienced with relational and NoSQL databases, data pipelines, and automation tools.
Currently focusing on Data Engineering and Data Warehousing to build efficient data systems and pipelines.

EDUCATION

Bachelor of Data Science & Artificial Intelligence 2021- 2025

University College of Applied Sciences, Gaza.

High School Education 2020 - 2021

Al Manfalut Secondary School, Gaza

PRACTICAL EXPERIENCE

Data Projects & Applied Work

Self-initiated and freelance projects – Gaza, Palestine

2022 – Present

- Practically trained and worked on data entry, data cleaning, and database management using SQL, MySQL, Excel, Airtable.
- proficient in using Airtable software for warehouse and inventory management, and have practical experience in creating and closing invoices, tracking inventory, organizing data, and analyzing operational data.
- Designed and implemented small data warehouses for academic and freelance projects.

SKILLS

- Programming Languages: Proficiency in Python and good knowledge of R, HTML, CSS, JavaScript, and C#, ASP.NET
- Airtable (Inventory & Warehouse Management, Invoicing, Data Analysis)
- Proficient in handling data, analyzing it, creating graphical representations of it, processing it, and applying the necessary algorithms to it, using Python, Power BI, Orange, Excel, and SQL
- Database Management: Skilled in SQL, MySQL, and database design

- Applied machine learning (ML) and deep learning (DL) models to real-world datasets from Kaggle and other sources.
- Participated in several Coursera and UCAS projects, applying professional data handling and reporting standards.
- Collaborated remotely with peers and mentors to simulate real work environments in data processing and automation.
- Conducted data analysis and visualization using Python, Power BI, and Orange to generate insights and reports.

TRAINING & CERTIFICATIONS

University of Colorado System – Coursera

- Database Management Essentials
- Data Warehouse Concepts, Design, and Data Integration

IBM – edX

- Data Engineering Basics for Everyone
- Relational Database Basics
- Introduction to SQL
- SQL Concepts for Data Engineers
- Relational Database Administration (DBA)
- NoSQL Database Basics
- Linux Commands & Shell Scripting
- Building ETL and Data Pipelines with Bash, Airflow, and Kafka

USMx / UMD – edX

- Project Management Principles
- Managing People with Power Skills
- Determining Ways of Working for Technical Project Management
- Gaining Business Acumen for Project Managers

Additional Notable Courses -Coursera

- Data Analysis Using Python
- Python for Data Visualization (Matplotlib & Seaborn)
- Supervised Machine Learning: Regression and Classification
- Advanced Learning Algorithms
- Exploratory Data Analysis with Seaborn
- Go Beyond the Numbers: Translate Data into Insights

- Problem Solving: Strong analytical and problem-solving abilities
- Debugging: Efficient in identifying and fixing bugs or errors in code
- Professional using MS Office: Word, Excel, PowerPoint and Access
- Advance using Photoshop program
- Time Management: Strong ability to manage tasks and meet deadlines efficiently
- Adaptability: Quick learner and adaptable to new technologies and tools
- Proficient in research data collection with excellent research methods gained through project based learning
- Proficient in using computer, laptop and phone with full ability to deal with most problems and full understanding of software and hardware parts
- Typing Arabic & English

LANGUAGE

- Arabic (Native)
- English (very good)

PROJECTS

- Retail Data Warehouse Project
- Expert-system-Fuzzy-assignment
- Boston housing dataset
- US Hurricane Data
- Charles_BookClub
- The Titanic Survivor Dataset
